DESCRIPTION

Installed inside the headliner, the curtain airbags (CAB) protect the driver and passengers from danger in the event of a side impact. The SRSCM determines deployment of curtain airbag based on side impact sensor (SIS) signal. The SRSCM determines deployment of curtain airbag by using side impact sensor (SIS) signal.

▲ CAUTION

Never attempt to measure the circuit resistance of the airbag module even if you are using the specified tester. If the circuit resistance is measured with a tester, accidental airbag deployment will result in serious personal injury.
